

Wideye™ SABRE™ I BGAN Terminal

Firmware Version R014.5.1

Information Bulletin

15 April 2014

Firmware download information

1. Download the firmware version R014.4.5.1 from any one of the following websites:
 - <http://www.inmarsat.com/Support/BGAN/>, click on “**Firmware**” to go to the firmware download page, or
 - <http://www.wideye.com.sg/>, click on “**Support > Download > For Users of SABRE I > Firmware Upgrade**” to go to the firmware download page, or enter the following URL to go directly:
<http://www.wideye.com.sg/metadot/index.pl?id=2518&isa=Category&op=show>.
2. Use the Wideye SABRE Firmware Upgrade Utility to upgrade the firmware. You can obtain this either
 - from the product CD supplied with your SABRE I, or
 - extract it by unzipping the firmware package downloaded as part of step 1.
3. Read and follow the instructions in the document ‘**SABRE 1 Firmware Upgrade Procedure**’, downloaded as part of step 2. This explains how to install the new firmware using the Upgrade Utility.
4. The latest User Guide and Quick Start Guide of SABRE I can be downloaded from <http://www.wideye.com.sg/>, at “**Support > Download > For Users of SABRE I**”, or enter the following URL to go directly:
<http://www.wideye.com.sg/metadot/index.pl?id=2512&isa=Category&op=show>

Note 1: This firmware release should be installed only on Wideye SABRE-I terminals.

Enhancements and fixes in this release

The enhancements and bug fixes to this release (compared to earlier release R014.4.6) include the following:

- Included new BGAN Protocol Stack with general enhancements and bug fixes
- Included support for China SAS
- Fixed DHCP issues on some of the Windows 7 PC/laptop
- Enhanced GPS performance by only switching off the GPS module after 3D fix is obtained
- Fixed a bug that causes event and error logs not in chronological order
- Fixed a bug that causes the use of ‘&’ character for APN password in WebConsole’s Primary Profile is not working.
- Fixed a bug that causes Ethernet interface cannot be disabled properly
- General WebConsole enhancements

- To allow the use of BGAN LAND Portable SIM card only

NOTE: Please contact support@wideye.com.sg for more details on any of the information stated in this firmware Information Bulletin.
